## PROFILE

---

Full stack software engineer with extensive experience in frontend applications with a focus on React and JavaScript (TypeScript) backends

## EXPERIENCE

---

**Route** | Full Stack Software Engineer II DEC 2021 - Present

- Owned and redesigned thank you page experience, utilizing custom component loader technology to efficiently load reusable Svelte components across multiple ecommerce platforms, seeing 42% increase in click through rates
- Developed consumer web app, creating a customizable order tracking landing page to attract more merchants into joining Route's network

**Currency Capital** | Full Stack Software Engineer MAR 2019 - NOV 2021

- Internationalizing customer onboarding by rearchitecting the existing financing app using Next.js, TypeScript, and Redux
- Built a scalable solution supporting different payment types for high-value items using Test Driven Development using React, Typescript, Node.js, Express, Jest, and Mabl, leading to consistent, dependable product deliveries
- Participated in developing a monorepo including a UI library increasing the team's productivity by 300%+ leading to an increase from \$40,000,000 in transaction volume to \$70,000,000 in transactions volume per month
- A proven force multiplier mentoring Currency test engineers to becoming full stack engineers

## EDUCATION

---

**Codesmith** | *Coding Bootcamp* 2019

- 3 month software engineering boot camp where I found excitement in mentoring fellow colleagues in solidifying their understanding on full stack technologies

**University of California, Santa Barbara** | *B.S. Financial Math and Stats* 2018

- First taste in engineering through linear algebra and statistic courses by using python to plot, analyze, and optimize data

## INTERESTS

---

Foodie, basketball, gaming, EDM, reminding people that my last name is not Parse
